

# KOWA CORPORATION

## Centralized lubrication control

Link the present to the future, curiosity for the change the world  
SMALL IS BEAUTIFUL

Aggressively develop free ideas by gazing at the "ground of demand" from a wide field-of-view.  
We have created new high-value-added businesses backed by our development capabilities and solid market strategies  
We are aggressively attacking with a strong curiosity in anticipation of modern society and the future.  
We contribute to society.

### ● Company Profile

COMPANY NAME : KOWA CORPORATION  
ESTABLISH : 1952 / APRIL  
INCORPORATION : 1960 / FEBRUARY  
CAPITAL : 95 million yen (Authorized Capital 120 million yen)  
HEAD OFFICE : (Nishi-Kujo, Konohana-ku, Osaka)  
Representative President/CEO : Mr Masami Hiroyasu

#### OFFICE/ WORKS

Ichikawa Works : (Ichikawacho, Kanzakigun, Hyogo.)  
Osaka branch : (Nishikujo, Konohana, Osaka)  
Hirokawa Works : (Hirokawacho, Aridagun, Wakayama)  
Tokyo branch : (Uchikanda, Chiyoda-ku, Tokyo)  
Nishi-nihon branch : (Shiromicho, Fukuyama, Hiroshima)

#### Products & Service

(1)Lubricating · Central lubricating system  
Forced circulation lubricator  
(2)Marine · Artificial fish reef  
(3)Marine system · Underwater exploration robot etc.  
(4)Food · Ready-to-eat meals  
(5)P&D · Planning and Development

### ● The oil department

~About the oil dept.~

Lubricant and lubricating device that contributes broadly to society through its original know-how We are Japan's only expert manufacturer of lubricant control, which is capable of development a series of actual systems based on its many years of on-site management technologies and response to all kinds of technologies, from large to small.

Please feel free to contact us for lubricant control.

In addition to equipment detailed advice based on the accumulated result and know-how of the our over many years, we believe that the use of this information in factories, machinery, and facilities will contribute to further energy-savings, lower costs, and higher functionality.

More speedy, more reliable and more economically...  
We are getting rid of the useless and materialize the best centralized lubrication control system

SINGLE LINE, DUAL LINE are reliable system which break the common practice of the existing lubrication system.

Our systems make lubrication works rationalized and labor saved..It can reduce the running cost because the needed amount of grease can be properly lubricated to the required points without human hands even then the machine is operated. Even then the machine is operated.

To meet the demanded of advanced lubrication management, useability and convenience are improved more. You can choose the best system according to various kinds of lubrication condition and machine facilities.

## Oil circulate

Oil circulating system succeeded the standardization of the system and function.

Advanced system which contribute to the VA and VE.

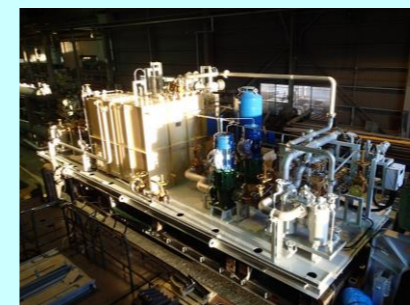

As the machine and system become more advanced the demanded for the gears more accurate and bearings also become severe such as to be faster, smaller, and more accurate The quality of the lubrication system highly influences hines the durability of the machines.

KOWA's oil circulating system standardizes 7 series 286 units complying with such a high needs.

It lubricates the best lubricant of the proper amount with the proper pressure and temperature to the bearings and gears of the various kinds of machine.

It can also collect the used oil to the lubrication circuit and continuously lubricate after controlling the oil clean.  
At present, well over 9,000 units have manufactured.

As the lubrication system contributing to the VA and VE, they are widely adapted in the industrial world.
